PROFESSIONAL SUMMARY

AI GTM Engineer who engineers the full revenue motion - signal architecture, multi-channel outbound, demand gen, and pipeline attribution - then ships the production Python, AI agents, and MCPs that make it run without human coordination. Bridges Marketing, Sales, Product, and CS through data infrastructure, not through meetings.

3+ years at B2B scale-ups (cybersecurity, IT services, AI search); 5+ years across sales, RevOps, and GTM total. At Omnibound AI: cut campaign deploy time 2 weeks → 3 days, unified 6 siloed data sources into a single AI-scored signal layer, and translated PMM positioning shifts into campaign execution the same week.

\$550K+ Revenue · \$3.5M+ Pipeline · 2 Wks → 3 Days Deploy · 1.5%+ Reply Rates · 48h → 4h
Qualification

CORE SKILLS

- GTM Engineering - End-to-end outbound system design · ICP segmentation by title/industry/pain · Signal-based prospecting · Targeted list building · A/B testing of sequences, messaging, and creative · Outbound copywriting · Nurture sequence design across the full lifecycle · Event-led and pre-event outreach · Multi-channel orchestration (email + LinkedIn + phone) · SDR team enablement and scaling.
- AI & Agentic Workflows - Claude Code · Anthropic API · OpenAI API · MCPs · Prompt + context engineering · Multi-stage orchestrated LLM pipelines that ship and run unattended · Hyper-personalization at scale via per-contact AI copy generation · Strategic automation for content, email, and SEO · Custom lead-scoring rubrics · Custom scoring agents · Retry + branching patterns in agent flows.
- Engineering Depth - Python (requests, BeautifulSoup, Scrapy, Playwright, asyncio) · JavaScript · SQL · bash · Async fan-out patterns · Headless browser automation · REST APIs · Webhooks · Web scraping and structured extraction from unstructured sources · Data pipeline design from scratch · Custom API integrations.
- Funnel Architecture & Demand Gen - Salesforce / HubSpot / Marketo / Outreach / Attio · LinkedIn Ads · Meta Ads · Google Ads API · GA4 · GSC · Looker · SEMrush · Ahrefs · Programmatic content + SEO pipelines · Performance ad automation with conversion tracking wired to pipeline data.
- Product Marketing Partnership - Positioning · Messaging frameworks · Early-to-scale-stage narrative shifts · Trend analysis · Initial branding · Cross-functional collaboration with PMM, Product, Content, SEO, Founder · Building systems that turn content, insights, and product signals into high-performing campaign programs.
- Cross-Functional Enablement - Worked with Sales, Marketing, Product, Engineering, CS, Support, SEO, and Content · Real-time CRM sync via webhooks eliminates manual data entry · Attribution dashboards make pipeline ROI visible to every team.

WORK HISTORY

Omnibound AI - AI GTM Engineer (Founder's Office / GTM Strategy) | Oct 2025 - Present | Remote (EOR: Native Teams)

AI Search Marketing Platform - signal-led GTM infrastructure for B2B scale-ups.

- Cut campaign deploy time 2 weeks → under 3 days and sustained 1.5%+ positive reply rates across 300+ mailboxes - signal-led outbound engine on Trigify + PhantomBuster → Claude Code → n8n → Supabase → Clay → HubSpot → Slack (150+ sending domains).

- 7-stage orchestrated LLM pipeline in Clay for SEMrush/Ahrefs stack-displacement targeting: role mapping → SEO intel → gap analysis → AI search gap analysis → strategic positioning → email generation. Per-contact hyper-personalized copy that scales without human review.
- Replaced 6+ hrs/batch of manual research with a sub-30-min automated pass - Python (Playwright, asyncio) enrichment agent on Supabase: headless scraping across 100+ domains, Claude Code scoring rubric (composite 0-100 from firmographic + technographic + behavioral), qualified accounts auto-pushed to HubSpot with full routing context, runs unattended.
- PMM + Founder partnership: worked directly with Product Marketing, Product, Content, SEO, and Founder on positioning, trend analysis, and scale-stage messaging evolution - translated narrative shifts into campaign execution in the same week.
- Cut lead qualification → outreach from 48h+ to under 4 hours - unified 6 siloed sources (Product API webhooks, GA4/Mixpanel, SEMrush API, Content, CRM, SEO) into one AI-scored signal layer (composite 0-100, firmographic + technographic + behavioral), auto-routing to 4 Slack channels by signal type.

RemoteState (IT Services - \$12.2M ARR) - AI GTM Engineer, Founder's Office | Apr 2023 - Jun 2025 | Noida

Owned the entire outbound engine from greenfield; cross-functional collaboration with Product, Marketing, Engineering, and CS.

- Delivered 40% pipeline efficiency gain and \$180K+ ARR growth in 6 months - AI GTM engine on Clay + Smartlead + CloudTalk + n8n across 250+ sending domains (95%+ deliverability), 1.5%+ reply rates, 18-39% SQL conversion on trigger-based workflows (12-20 SQLs/campaign).
- Custom OpenAI lead-scoring rubric cut qualification cycle from 48h → 9.6h (80% reduction); webhook schema designed with Product + Engineering for clean CRM ingestion.
- 5-source competitive-intel + market-research enrichment (Apollo + Persana + GPT + Clearbit + internal CRM) - 45% improvement in targeting accuracy. Enriched ICPs for US/EU enterprise IT-services outbound.
- Scaled SDR team 1 → 4 with automation-first playbooks (300% productivity gain). Real-time CRM sync via HubSpot + n8n webhooks eliminated 15h/week of manual data entry - Sales / CS / Support all routing from one data layer.

FalconWise Tech (Cybersecurity, Dubai) - Head of Growth, Contract | Dec 2022 - Apr 2023 | Remote
Zero-to-one ABM engine for the MENA cybersecurity market; partnered with Design, Content, and regional cybersecurity vendors.

- Built ABM engine from zero - Apollo + Persana + GPT workflows across 5 data sources, 10+ SQLs/month, 30% engagement rate, 45% improvement in targeting accuracy. Multi-channel campaigns targeting enterprise CISOs, CTOs, and Heads of Security across MENA.
- Co-marketing partnership channel with 3 regional cybersecurity vendors (security-services + vendor CS co-sell) - 25% of total pipeline from partner referrals.

CareerLabs Tech (EdTech, \$2.2M funding) - Senior BDR | Jun 2022 - Dec 2022 | Bangalore

Rebuilt outbound motion end-to-end; partnered with Marketing (UTM), Content (messaging), and Product (demo env).

- Rebuilt outbound automation on Reply + HubSpot - SQL conversion 16% → 27% (+69% lift), response time 4h → 2.4h, 50+ remote demos at 65% show-up rate (automated reminder sequences via Marketing infrastructure).
- \$25K+ in course enrollments; improved onboarding via Product + CS collaboration on new-user journey.

TOOLCHAIN

GTM Platforms: Salesforce · HubSpot · Marketo · Outreach · Pipedrive · Attio · ClickUp

Outbound & Enrichment: Clay · Apollo · LinkedIn Sales Navigator · Firecrawl · Smartlead · Instantly · Lemlist · Findymail · Prospeo · BetterContact · ZeroBounce

Intent & Signals: Trigify · PhantomBuster · CommonRoom · Bombora · RB2B · Sumble · Jungler
AI / LLM / Agentic: Claude Code · Anthropic API · OpenAI API · MCPs · Openrouter / Groq / Nvidia ·
deepline CLI · Jungler · n8n · Make · Zapier · Python (requests, BeautifulSoup, Scrapy, Playwright, asyncio)
· Apify · Zenrows · Firecrawl
Multi-Channel: HeyReach · LinkedIn · CloudTalk
Data Infra: Supabase · PostgreSQL · Redis (queue mode) · Webhooks · REST APIs · SQL
Demand Gen & SEO: LinkedIn Ads · Meta Ads · Google Ads API · SEMrush · Ahrefs · GA4 · GSC ·
Mixpanel · Looker
Project Management: Trello · Asana · Monday · ClickUp
Design Collab: Figma (asset request automation via n8n)

EDUCATION

BCA, Computer Science - Sabarmati University, Ahmedabad | 2020
